 - C. extremely slow
 - D. too slow
- 25. Which word is correctly spelt?
 - A. Diarhoea B. Pronunciation
 - C. Lugage D. Sustainance

Reaal. Eepassa zeeli » and ans zer and a 2 air 2

Ten years ago, a computer was a large, static and very expensive piece of machinery, operated by an expert elite who communicated with it in a language which only they understood. Today, computers are small, portable and cheap, and may be programmed by school children with an ease and assurance that terrifies their parents.

These developments have inevitably set in motion yet another educational bandwagons which most teachers have by now learnt to view with extreme caution. Surely the microcomputer will go 'he way of no competition that is embraced with enthusiasm by teachers and pupils.

Its usefulness cannot be overstated, its flexibility is unlimited. In the next decade, microcomputers will stimulate radical changes *in* each area of the educational system. Their potential has already been recognised and exploited in other fields. Schools will not so much be moving with the times as running to catch up. Ideally, the reading courses of the future will not only look different to today's teachers, they will be unrecognisable.

More imaginative programmes are being written. For example the computer can be used in the classroom to teach story writing. In one, the child is invited to write a story with a computer choosing from a list of possible scenes. Supposing the child selects 'football match.' The screen clears and a green pitch appears. The computer asks, ''what would you see at a footbali match? The child thinks or discusses with a partner and types in **police**. The computer scans its memory, finds "police' and positions little blue policemen around the perimeter of the pitch. Gradually, the picture is built up. If the child cannot complete it, then he or she asks for help. The computer could offer suggestions, for example, "There are elev **contents** in a team. Then the child types in and if the picture is complete, a whistle blows and a player runs with the ball and scores a goal. The computer asks *the* child if he or she wants to repeat the section or choose the next scene. Potential is very great as it creates opportunity for effective teaching of skills. No spelling misakes or grammatical errors

- 29. '- the microcomputer Will go the way of no competition means
 - A. computers will go away with time.
 - B. computers will be movable and competitive with others.
 - C. they are not opposed and have no competition.
 - D. no one will compete to win a computer.
- **30.** Why will microcomputers stimulate radical changes in all educational systems?
 - A. They have unlimited flexibility and are very useful.
 - B. They are liked by all teachers and **papts**.
 - C. They are smail and *easy* to use.
 - D. All people will be computer literate.
- **31.** What is **he** proof that the computer will **timulate** radical clanges in education? A. Its usefulness has been overstated.
 - B. It is not recognised by other fields at all
 - C. Schools are not moving with the times.
 - D. It has been exploited in other fields.
- **32.** Vhat will be different *in* the reading courses of the future? They will
 - A. look different and recognisable.
 - B. look different and unrecognisable.
 - C. be'the same.
 - D. be easily recognised and less in variation.
- 33. Who is writing the imaginative program . in computers?A. 'Ihe pupil
 - B. The teachers
 - C. Computer programmers
 - D. Everyone

- 34. When would the screen of the computer clear and a green pitch appear? When
 - A. the child has selected the topic.
 - B. the child has been invited to write.C. imaginative programmes are being
 - written.
 - D. the wrong choice has appeared.
- 35. Why does the computer ask questions?
 - A. It doesn't know the next step.
 - B. To make the child change topics.
 - C. To help the child write creative work.
 - D, The computer is able to store information.
- 36. Why could the picture of the pit the not complete when the child types in 'police?
 - A. The option given was not correct.
 - B. The computer could not scan memory.
 - C. The **computer** could not tell the mcanm...
 - D. The computer needed much help.
- 37. If the pupils cannot complete the questions well, what can they do?
 - A. Discuss among themselves
 - B. Ask the computer to help.
 - C. They could think.
 - D. The could scan the computer memory.
- **38.** Which of the following statements is true according to the passage?
 - A. Typed work is difficult to mark in computers.
 - B. Pictures are present in writing work.
 - C. Grammatical errors and spellings are automatically corrected.
 - D. Computers are limited.

Readthepassage below and answer questions 39 ta 50.

A. In Hand Street, Southern South of

R., Soltones and participation will be stated.

nmes

Many children are wating their childhood working in urban households as domestic servants. Six years ago, the fourth born in a family of six, Sonali, a companied her aunt from their rural home in Kisii, after the aunt convinced her mother -- a widow -- that she was going to educate the girl along with her own children.

inNrir i, the id o! in; to school was discarded and Sonali becam vie n ery morning she would wake u; it 5 am to prepare breakfast. When her cousins h eventually woke up, he would help them to dress ud when they had left in would wash their clothe. She did all the chores.

Her nly free time was when she went to church on Sunday, which was only allowed after the intervention of her uncle. 'My aunt was very mean to me, but my cousins and uncle treated me better," shesays.
