- 1. In which part of the body does ovulation take place?
 - A Weir
- B. Oviduct
- C. Uterus
- D. Vagina
- 2. Which one of the food substances below help to maintain healthy teeth?
 - A. Chocolate
 - B. Cakes
 - C. Sugarcane
 - D. Biscuits
- 3. Animals whose bodies are covered with hair or fur also
 - A. give birth to live young ones.
 - B. have constant body temperature.
 - C. only live on dry land.
 - D. have scales on their legs.
- 4. The main reason why a rain gauge is dug

into the ground is to

- A. prevent it from harsh weather conditions.
- B. reduce the amount **O**ruming water getting to it.
- C. reduce the rate of evaporation.
- D. prevent water from splashing to it
- 5. The diagram below shows.

- **6.** Which one of the following is not true about zero grazing?
 - A. Less food is wasted.
 - **B.** Less labour is required.
 - C. It is easy to collect manure.
 - **D.** There is less movement of animals.

The following are characteristics of soil;

- i. Poorly drained
- ii. Cracks when dry

iii. Highest capillarity

i. Fineparticles

The type of soil described above is

A. loam

B. sand

C.clay

D. silt

A person looks healthy and strong but medical test on HIV is positive. Which stage is he likely to be?

A. Symptomatic

B. Full blown

C. Window

D. Incubation

t

Three of the following are traditinal methods of food preservation.

Whichone is not?

A. Use of low temperatures

B. Smoking

C. Drying

D. Refrigeration

A. convection inliquids

B. conduction inliquids

C. boilng of water

D. radiation in liquids

of air.

Which of the following letters is correctly matched with itsuse?

A. C- used in bulbs and tubes.

B. A - preserving soft drinks.

C. D - making proteins in leguminous plants.

D. B - used in germination.

8.

9.

- 11. Which one of the following is not true about nimbus clouds? They A. are found low in the My. B. indicate fine weather. C. are mountaneous in appearance. D. are dark grey in colour.
- 12. Which of the diseases below is a child immunised against at birth?
 - A. Tetanus
 - B. Measles
 - C. Whooping cough
 - D. Tuberculosis
- 13. Which one of the following is not an artificial source of light?

A. Stars

B. Sun

C. Moon D. Firefly

- 14. Which one Snot a method of grazing? A. Herding
 - B. Paddocking
 - C. Stall feeding
 - D. Rotational grazing
- 15. Achild was diagnosed with the following signs and symptoms;
- i. Pale finger nails

ii. Dizziness

The child is likely to be suffering from

A. anaemia B. marasmus

C. rickets

D. kwashiokor

- Which of the combinations below consists 16. of non-green plants only?
 - A. Algae, mucor, pufball
 - B. Yeast, lichen, fern
 - C. Pine, lichen, cypress
 - D. Puffball, mushroom, yeast

The diagram below shows a weather instrument.

Which statement is not true about it?

- A. The wind is blowing towards point A.
- B. The size of the tail should be twice the arrow head.
- C. The head pointswhere the wind is blowing from.
- D. It should not be firmly fixed to allow free rotation.
- A process through which white light is split is known as

a spectrum

B. reflection

C. refraction

D. dispersion

- 21. Mass is defined as
- 17. Which planet has the smallest orbit?

A.Earth B. Neptune

C. Mercury

D. Jupiter

18. In which part of the alimentery canal is undigested food store be or bing removed from the booking

A. Anus

C. Stomach

Ecolebooks.com

- A. the pull of gravity on a body.
- B. the quantity of matter in a substance.
- C. the volume of matter in a substance.
- D. the heaviness of an object.
- 22. Which of the following parts of a flower protects it during the bud stage?
 - A. Petal
- B. **£i**gma
- C. Sepal
- D. Ovary
- 23. Below is a representation of a human tooth.
 - The problem shown is
 - A. dental carries
 - B. dental cavity
 - C. gingivitis
 - D. dental floss
- **24.** Landslide is a form of erosion.
 - A. gulley
- B. sheet
- C. splash
- D. rill

Ecolebooks.com

- 25. The following are characteristics of a certain weed;
 - *i* Has yellowfruits when ripe.
 - ii. Has purpleflowers.
 - iii. Leaves and stems Lave thoms.
 - The weed described above is
 - A. thorn apple
 - B. blackjack
 - C. sodom apple
 - D. mexican marigold
- 26. Which of the following ways is an artificial way of lighting a house? Using
 - A. electricity
 - B. transparent windows
 - C. sky lights
 - D. frosted glass
- 27. Sound travels fastest in which medium?
 - A. Liquid
- B. Gas
- C. Vacuum
- D. Solid
- 28. Below is an experiment that was done to investigate a certain property of matter.

Rubber strip

What conclusion was made?

- A. The pins started falling one afer another.
- B. All the pins fell off at the same time.
- C. Rubber is a poor conductor of heat.
- D. Pin I fell offfirst.
- **29.** Which one of the following is not a function of roots?

- **31.** The type of soil erosion where small holes are freed in the soil is called
 - A. splash
- B. rill
- C. gulley
- D. sheet
- 32. Which one of the following animal feeds is a concentrate?
 - A. Lucemn
- B. Silage
- C. Pasture
- D. Dairy meal
- A. Absorption of water and mineral salts.
- B. Food storage in some plants.
- C. Supporting the plants firmly in the soil.
- D. Transpiration.
- 30. Which one of the conditions below is not necessary for plants to make their own food?
