**MARKING PRINCIPLES:**

1. Penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item. No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Full marks for correct answer. If answer incorrect, mark the workings provided.
4. If a pre-adjustment figure is shown as the final figure, award one mark. Not the method mark for the answer. Note: if figures are stipulated in memo for components of workings, these do not carry the method for final answer.
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. This memorandum is not for public distribution, as certain items might imply incorrect treatment. The adjustments made are due to nuances in a certain question.
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, the marker must inspect the reasonableness of the answer before awarding the mark.
10. Operation' means 'Check operation'. 'One part correct' means 'Operation & one part correct'. Note: check operation must be +, -, x, ÷, or per candidates operation.
11. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect, indicate with a . Note: do not award marks for workings if numerator and denominator are swapped-this also applies to ratios.
12. Be aware of candidates who provide valid alternatives beyond the marking guideline.
13. Codes: f=foreign item; p=placement.

**QUESTION 2**

**2.1.1 Explain the difference between the perpetual stock system and the periodic stock system.**

Any valid difference with comparison ✓✓

Part mark incomplete/one- system only explanation

Perpetual stock system	Periodic stock system
Cost of sales calculated at point of sale.	Cost of sales calculated at end of financial period.
Stock value can be determined at any time from records.	Stock value determined / identified by stock count.
Cost of sales account used	Purchases account used
Stock bought regarded as an asset	Stock bought regarded as an expense

2

**2.1.2 Calculate the value of the stock on hand on 31 May 2020 using the weighted-average method.**

$$\frac{949\,000 \checkmark - 37\,000 \checkmark}{5\,000 \checkmark - 200 \checkmark}$$

**2.1.4 Calculate the value of closing stock using the FIFO method.**

$$(800 - 200) 600 \times 185 = 111\ 000 \checkmark\checkmark$$

$$600 \times 170 = 102\ 000 \checkmark\checkmark$$

$$= 213\ 000 \checkmark \text{ closing stock (FIFO) operation one part correct}$$

5

**Give ONE reason in favour of changing to the FIFO method**

Any valid reason  $\checkmark\checkmark$  Part mark for incomplete / unclear reason

- Gross profit will be lower because closing stock would be lower.
- Easy to count or identify jackets individually.
- Value of jackets is continuously changing and valued at more recent prices.

2

**Give ONE reason against changing to the FIFO method.**

Any valid reason  $\checkmark\checkmark$  Part mark for incomplete / unclear reason

- No need to change as profit will be the same in the long-term.
- Unethical to manipulate the profit by changing the method of stock valuation.
- Tax would decreased in first year as result of decreased profit.
- The change would affect comparisons across financial years.

12 200 units  operation one part correct

4

3.3.2 Explain why the owner should be concerned about the break-even point. Provide TWO points.

Any two valid point ✓✓ ✓✓ Part mark for incomplete / unclear point

Number of units produced is 12 200 same as the break-even point of 12 200. Which means the business is making no profit or loss.

Although the number of units produced increased from 11 800 to 12 200 still no profits were realised because fixed costs also increased.

4

3.3.3 Provide one reason for the decrease in the Direct Material Cost.

Any valid explanation ✓✓ Part mark for incomplete / unclear explanation

- There was less wastage of raw material during production.
- More efficiency during the production process.
- Sourcing out cheaper suppliers.
- Buying in bulk to negotiate discounts.

**4.2.1**

**Explain how the Fixed Assets Register will assist you in your duties as internal auditor. Provide ONE point.**

Any valid point ✓✓

Part mark for incomplete / unclear point

- Physical count should agree with register.
- The internal audit has to verify the physical presence of items listed in the fixed assets register.
- The internal auditor will be able to follow the lifespan of the item of fixed asset and make recommendations for timeous replacements.
- Calculations of depreciation amounts can be checked.

2

**4.2.2**

**The stock of trolleys and baskets is classified as a fixed asset. Give ONE suitable reason for this.**

Any valid point ✓✓

Part mark for incomplete / unclear point

- A trolley/basket is expected to have a lifespan of more than twelve months
- The trolleys/basket are not part of trading stock

2

4.2.3

Identify and explain **THREE** major problems (with figures) relating to the control of the trolleys and baskets. In **EACH** case, provide a valid, practical solution to improve the control over these assets.

PROBLEM WITH FIGURES	PRACTICAL SOLUTION TO IMPROVE INTERNAL CONTROL
Problem and a figure ✓ ✓ ✓	Solution relating to the problem ✓ ✓ ✓ (Do not accept improvement of control as a solution.)
30 trolleys were stolen (170 + 115 – 25 – 230). / R63 000 lost on this theft (30 x R2 100).	All trolleys used should be returned to the business. / Can introduce a fee for the return of a trolley. / Secure trolleys when not in use.
A large amount of R10 200 has been spent on repairs of baskets. / Instead of repairing baskets, 34 new baskets could have been bought.	Before doing repairs to baskets, consider whether it would be more cost-effective to replace old baskets with newer ones.
Number of trolley controllers are too many (3), 230 trolleys can be controlled by one person and save (2 400x120) 28 800 for salaries.	Save salary for two trolley controllers and buy new trolleys (13 or 14) or buy new baskets (98)
On a busy day there is not enough trolleys and baskets. For the 510 customers there are only 230 trolleys and 110 baskets (total 3340/short of 170).	Buy more baskets as they are easier to control and cheaper to replace (R250).
25 damaged trolleys were written off. (Cost of replacement R27 000).	Monitor usage of trolleys to ensure that customers do not abuse them.
