MATHEMATICAL LITERACY P2

NOVEMBER 2014

MEMORANDUM

MARKS: 150

Symbol	Explanation
M	Method
M/A	Method with accuracy
CA	Consistent accuracy
A	Accuracy
C	Conversion
S	Simplification
RT/RG	Reading from a table/Reading from a graph
SF	Correct substitution in a formula
O	Opinion/Example
P	Penalty, e.g. for no units, incorrect rounding off, etc.
R	Rounding off
NPR	No penalty for rounding

This memorandum consists of 20 pages.

QUESTION 1 [38 MARKS]			
Ques	Solution	Explanation	
1.1.1	✓A The data is **discrete**, because the **violent incidents** is counted/whole numbers/integral values /categorised ✓O	1A correct type 1O reason (2)	L4
* 1.1.2	Total number of incidents involving boys = 13 + 12 + 18 + 11 + 10 + 16 = 80 ✓ S Total number of incidents involving girls = 7 + 3 + 4 + 7 + 5 + 19 ✓RG = 45 ✓ CA Difference = 80 – 45 = 35✓ CA **OR** Total for boys and girls = 20+15+22+18+15+35 = 125 ✓ S Total for boys = 13 + 12 + 18 + 11 + 10 + 16 = 80 ✓ S Number of girls = 125 – 80 = 45 ✓ CA Difference = 80 – 45 = 35 ✓ CA **OR** The total of the differences between boys and girls ✓ A ✓ A ✓ A = 6 + 9 + 14 + 4 + 5 – 3 = 35 ✓ CA	1S total number of boys 1RG reading from graph 1CA total number of girls 1CA difference **OR** 1S Total number of boys and girls 1S Total number of boys 1CA number of girls 1CA Difference **OR** 2A Positive differences 1A for negative 3 1CA the differences Max 2 marks if part data used Answer only full marks (4)	L3

* This question must not be marked in Limpopo. The paper will be marked out of 143 and scaled and then the candidates' total mark will be up-scaled to 150 marks

Ques	Solution	Explanation	
* 1.1.3	Cyber bullying ✓A Girls avoiding physical violence. ✓✓O **OR** Girls are afraid of confrontation and fighting ✓✓O **OR** ✓✓O Easier to express their emotions/feelings on social media	1A/RG reading from graph 2O explanation (3)	L3(1) L4(2)

1.2.1	Range = Highest value – Lowest value
	     5 = 18 – A ✓ M
	
	     A = 13 ✓ CA
	
	          ✓ M **OR**
	A = 18 – 5 = 13✓ CA
		1M concept of range
		1CA value of A
		
		OR
		1M concept of range using 5
		1CA value of A
		
		Answer only full marks
		                                    (2)
			L2

1.2.2	Mean = $\dfrac{13+14\times 4+15\times 5+16\times 10+17\times 13+18\times 7 \ \checkmark \ M}{40\ \checkmark \ A}$
	
	     $=\dfrac{651}{40}$ ✓ CA
	     = 16,275
		NB: Answer from Q 1.2.1
		1M adding all 40 values
		1A dividing by 40
		
		1CA Simplification
		
		NPR
		
		Answer only full marks
		                                    (3)
			L2

* This question must not be marked in Limpopo. The paper will be marked out of 143 and scaled and then the candidates' total mark will be up-scaled to 150 marks

Ques	Solution	Explanation	
1.2.3	$B = \dfrac{\overset{\checkmark A}{15 + 16}}{2} = 15,5 \checkmark CA$ $C = \dfrac{\overset{\checkmark M}{16 + 17}}{2} = 16,5 \checkmark CA$ $D = 17 \quad \checkmark CA$	1A identifying the correct values 1 CA value of B [If only B = 15 then one mark and If answer only B=23 then one mark] 1 M concept of median 1 CA value of C 1 CA value of D Answer Only full marks	L2
		(5)	
1.2.4	$P = \dfrac{\overset{\checkmark A}{30}}{\underset{\checkmark A}{40}}$ $= 0,75 \checkmark CA$	1A 30 grade 9 boys 1A no. of boys 40 1CA decimal Answer Only full marks	L2
		(3)	
1.2.5	The grade 9 boys are too old for their grade. $\checkmark\checkmark J$ **OR** Social: $\qquad\qquad\qquad\checkmark\checkmark J$ Need recognition / low self- esteem / identity crisis. **OR** Economic: To gain favours from others. $\checkmark\checkmark J$ **OR** Educational: They are frustrated by their lack of progress. $\checkmark\checkmark J$ **OR** Environmental factors/ emotional factors $\checkmark\checkmark J$ **OR** $\qquad\qquad \checkmark\checkmark J$ Contextual factors/ No parental control/Peer pressure **OR** $\qquad\qquad\qquad \checkmark\checkmark J$ Violent community / child headed family/gang related	2J reason	L4
		(2)	

Ques	Solution	Explanation	
1.3.1	Total cost in Rand $\checkmark$A $\checkmark$A $\checkmark$A = 300 for the first 15 passengers + 50 × the number of persons more than 15 $\checkmark$A **OR** Total cost (in Rand) $\checkmark$A $\checkmark$A $\checkmark$A $\checkmark$A = 300 + (the number of persons – 15) ×50 **OR** Total cost (in Rand) $\checkmark$A $\checkmark$A $\checkmark$A = 300 + (n – 15 persons) ×50 $\checkmark$A Where n is the number of persons more than 15 **OR** Total cost (in Rand) $\checkmark$A $\checkmark$A = (number of persons)× 50 – 450 $\checkmark\checkmark$A	1A constant cost 1A 15 persons 1A number of persons more than 15 1A multiply by the rate R50 **OR** 1A constant cost 1A using 15 persons 1A using a variable with explanation 1A multiply by the rate R50 **OR** 1A constant cost 1A using 15 persons 1A using a variable with explanation 1A multiply by the rate R50 **OR** 2A – 450 1A number of persons 1A multiply by the rate R50 (4)	
1.3.2 (a)	$\checkmark$SF $900 = 300 + (n - 15 \text{ persons}) \times 50$ $(n - 15 \text{ persons}) \times 50 = 600$ $n - 15 \text{ persons} = 12$ $n = 27$ $\checkmark$A **OR** 27 $\checkmark\checkmark$RT	1SF Substituting in formula 1A Maximum number **OR** 2 RT Max number of passengers [Both 25 and 27 one mark and 25 only, no marks] (2)	L3

Please turn over

Ques	Solution	Explanation	
1.3.2 (b)	10 learners + 1 teacher 10 learners + 1 teacher ✓✓MA 4 learners + 1 teacher ∴ 24 learners and 3 teachers ✓A 24 : 3 ✓CA = 8 : 1 ✓CA **OR** 1 educator for 10 learners ✓ MA ∴ $\frac{1}{11} \times 27 = 2,454545...$ teachers ✓ CA ∴ 3 teachers ✓ R And 24 learners 24 : 3 ✓ CA 8 : 1 ✓ CA	**NB:** Use CA from Q1.3.2(a) 2MA working with ratio 1A Number of teachers 1CA ratio in correct order 1CA simplified ratio **OR** 1MA working with ratio 1CA number of teachers 1R Rounding up 1CA ratio in correct order 1CA simplified ratio (5)	L3
1.3.3	There is only one double six. ✓ A There is 6 combinations of seven. ✓ A ∴ Mr Boitumelo has a larger probability than Miss Ansie to accompany the learners. ✓O **OR** ✓ A $P_{(\text{double six})} = \frac{1}{36} \approx 2,8\%$ $P_{(\text{seven})} = \frac{6}{36} = \frac{1}{6} \approx 16,7\%$ ✓ A ∴ Mr Boitumelo has a larger probability than Miss Ansie to accompany the learners. ✓ O	1A probability of double six 1A probability of seven 1O explanation **OR** 1A probability of double six 1A probability of seven 1O explanation (3)	L4
		[38]	

QUESTION 2 [33MARKS]			
Ques	**Solution**	**Explanation**	

2.1.1	Volume of petrol $= \dfrac{R500}{R14,04}$ litre ✓ M
	             $= 35,61253561$ litre ✓ A
	
	 Distance each model can travel with 35,613 ℓ of petrol:
	
	 Sonic 1.6 : $\dfrac{35,613}{6,7} \times 100$ km $\approx 531,54$ km ✓ CA
	
	 Aveo 1.6 : $\dfrac{35,613}{7,3} \times 100$ km $\approx 487,85$ km ✓ CA
	
	 $\therefore$ **Sonic 1.6** will travel a greater distance. ✓✓O
	
	 OR
	    ✓ M
	 Volume of petrol $= \dfrac{R500}{R14,04/\ell} = 35,613$ ℓ ✓ A
	 Finding distance using consumption rate for each model:
	
	 Sonic rate $= \dfrac{100\,km}{6,7\ell} = 14,925$ km/ℓ
	
	 Distance $= 14,925$ km/ℓ $\times 35,613 \approx 531,5$ km ✓ CA
	
	 Aveo rate $= \dfrac{100\,km}{7,3\ell} = 13,70$ km/ℓ
	
	 Distance $= 13,70$ km/ℓ $\times 35,613 \approx 487,9$ km ✓ CA
	
	 $\therefore$ **Sonic 1.6** will travel a greater distance. ✓✓O
		1M dividing by R14,04/ ℓ
		 1A volume
		
		 1CA distance
		
		 1CA distance
		
		 2O conclusion
		
		 OR

QUESTION 4 [45 marks]			
Ques	**Solution**	**Explanation**	
4.1.1(a)	✓A ✓A ✓CA M15 and M16	1A correct row number 1A seat number 1CA second seat number [15 and 16 two marks] (3)	L2
4.1.1(b)	✓A ✓A $24 \times 2 = 48$ seats	1A 24 seats 1A total number of seats (2)	L2
4.1.1(c)	✓RT ✓MA ✓RT Total income in OR = $(72 \times 78) + (388 \times 48) + (83 \times 42)$ $+ (81 \times 28) + (112 \times 15) + (82 \times 10)$ ✓S ✓RT $= 5\,616 + 18\,624 + 3\,486 + 2\,268 + 1\,680 + 820$ $= 32\,494$ ✓CA	* seats from Q 4.1.1 (b) 1MA adding the values 1RT cost zone A and B 1RT cost for zone C and D 1RT cost for zone E and F 1S simplification 1CA answer [One mark for every 2 zones] (6)	L3

4.1.2(a)	Cost for 1 zone B ticket = 48 OR ✓A
	                       = R27, 2183 × 48
	                       = R 1 306,48 ✓C
	
	Cost in Euro for one flight ticket = 492, 29
	
	Cost in OR for one flight ticket $= \dfrac{492,29}{1,87126}$ ✓M
	
	                     = 263,08
	
	Cost in Rand for one flight ticket $= 263,08 \times$ R 27, 2183 ✓M
	
	                     = 7 160, 59 ✓CA
	
	Total cost per person = R 1 306,48 + R 7 160, 59
	                     = R 8 467,07 ✓CA
	
	Total cost for two = R 8 467,07 × 2
	              = R 16 934,14 ✓CA
	
	                           OR
		1A cost of ticket
		
		1C convert OR to Rand
		
		1M convert Euro to OR
		
		1M convert OR to Rand
		
		1CA cost of one ticket
		
		1CA calculating total cost per person
		
		1CA calculating total cost for two people
		
		           OR
			L4

Ques	Solution	Explanation	
4.1.2(a) (cont.)	Cost for 2 zone B tickets = 2 × 48 OR = 96 OR ✓A = R27, 2183 × 96 = R2 612, 96 ✓C Cost for 2 flight tickets = 2 × €492, 29 = €984, 58 ✓A €984, 58 = $\dfrac{R27,2183 \times 984,58}{1,87126}$ ✓✓M = R14 321, 15 ✓CA Total cost = R2 612, 96 + R14 321, 15 = R16 934, 11 ✓CA **OR** ✓A Cost for Zone B tickets: 2 × 48 OR = 96 OR ✓A Flight tickets in OR = $\dfrac{2 \times 492,29}{1,87126}$ ✓C = 526,1588448 ✓CA Total cost: 526,1588448 + 96 = 622,1588448 ✓CA Cost in Rand = 622,1588448 × 27,2183 ✓C = 16 934,11 ✓CA	1A cost for one ticket 1C conversion 1A 2 flight tickets 2M convert Euro to rand 1CA cost of 2 tickets in rand 1CA total cost **OR** 1A cost for one ticket 1A cost of 2 tickets 1C conversion to OR 1CA ticket price 1CA total cost 1C convert OR to Rand 1CA cost in rand (7)	
4.1.2(b)	Time leaving Johannesburg + flight time = 20h30 +11h25 = 31h55 ✓A ✓CA Time in South Africa when they arrived: 07:55 or 7.55 am or five minutes to eight in the morning	1A adding 1CA correct time [If written as 07h55 one mark only] Answer only full marks (2)	L2
4.2.1	South westerly (SW) ✓✓A **OR** South, south westerly (SSW)	2A correct direction (2)	L2

Ques	Solution	Explanation	
4.2.2	This chart only shows distances from Muscat. $\checkmark\checkmark$O OR $\checkmark\checkmark$O They don't lie in the same direction. $\checkmark\checkmark$O OR This is not a map / strip chart.	2O opinion (2)	L4
4.2.3	Muscat to Sydney $\approx$ 3 349km $\times$ 3,5 $\quad$ $\checkmark$RT $\checkmark$M $\approx$ 10 716,8 to 11 721, 5km $\quad$ $\checkmark$CA	1RT correct value 1M multiplication by 3 349 1CA correct distance [Range of values 3,2 to 3,5] [3 or 4 then max 2 marks] (3)	L2
