QUESTION 19**Answer:**

- Drumming is always improvised
- The music is essentially a series of variations on stated rhythmic patterns
- The master drummer stands in the centre of the ensemble and is responsible for directing the whole performance
- The master drummer will signal to other players when he is ready to start. This is often done with a vocal cry followed by a short rhythmic solo to set the mood and tempo of the music
- During the performance the master drummer will signal to individual players to perform a solo. The solo will be a variation or development of the original rhythm pattern and will lead to further rhythmic developments by other players
- The master drummer will indicate the start of contrasting sections throughout the performance, creating the structure
- A steady continuous beat, called the time-line, is often played by the master drummer and bells may be included (cow-bell or agogo bells) to reinforce the beat
- The rhythms played by different drummers create polyrhythm
