Breeds of Chicken

What is a breed?

[SOURCES LIKE THIS ON EBOOKS.COM](https://www.ebooks.com)

- ▶ A breed is a group of animals with specific characteristics/behaviours.

Groups of breeds of chicken kept in Uganda

1. Local breeds (Indigenous)
 2. Exotic breeds (Imported/foreign)
- ▶ **NB:** Exotic breeds can either be grouped as heavy breeds or light breeds.

Local breeds

Characteristics of Local breeds

- They are more resistant to diseases and parasites.
- They can withstand harsh climatic conditions than the exotic.
- They have a slow growth rate.
- They lay small and only a few eggs during each laying season.

Disadvantages of keeping local breeds of chicken.

- They grow very slowly.
- They lay fewer eggs.

How to improve upon the local breeds of chicken?

- Through cross-breeding of local breeds with exotic breeds to get a hybrid.

[DOWNLOAD MORE RESOURCES LIKE THIS ON
ECOLEBOOKS.COM](http://Ecolebooks.com)

- Through selective breeding (choosing breeds of good quality).
- Through outbreeding - the mating of different families of the same breed

Definition of Cross Breeding

Cross breeding is the mating of animals of different breeds.

ECOLEBOOKS.COM](http://Ecolebooks.com)

Advantages of cross-breeding

- Encourages fast growth in birds
- Results into more eggs being laid by the offspring.
- Improves on the productivity of poultry.
